## Turning re-invented: PrimeTurning™ and CoroTurn® Prime

PrimeTurning™ is a new turning methodology which enables turning in all directions. Delivering a 50% increase in productivity or higher compared to conventional turning solutions.

This is not just a new tool, it is a totally new way of turning.

## CoroTurn® Prime SL head: Internal PrimeTurning™ for smaller diameters

With CoroTurn® Prime SL heads it is now possible to use internal PrimeTurning™ for hole diameters down to 40 mm (1.575 inch). This will help you to increase your productivity and achieve excellent chip control. To secure maximum output, use the CoroPlus® ToolPath software that now also supports internal PrimeTurning™ applications.
